# THE WELLINGTON CAMPUS

Wellington campus aims to render the latest knowledge with best practices to mold the individual and society to be effective and efficient, to cope with the industrial and social challenges of the ever-changing world with positive values.

## INTERNATIONAL UNIVERSITY OF APPLIED SCIENCES

Since 1998, IU International University of Applied Sciences has become Germany's largest university, offering inclusive and accessible education. Pioneering online learning for over a decade, our fully integrated digital platform enables flexible learning from anywhere, anytime.

# WELLINGTON CAMPUS

## BACHELOR OF COMPUTER APPLICATION

Specializing in Computer Science offers great career prospects. You will lay the groundwork for your studies with introductory classes in programming, academic writing, and mathematics. These courses aim to equip you with the fundamental skills necessary to excel in

## BACHELOR OF ARTIFICIAL INTELLIGENCE

With a Bachelor in Artificial Intelligence from IU University of Applied Sciences, you'll have a foundation in speech and image processing, machine learning, robotics, UI/UX, and software development, making you a strong candidate for positions in leading international tech spaces and AI research teams.

## BACHELOR OF CYBER SECURITY

In this BSc cyber security course, you will learn not just about incident response and digital forensics, but also aspects of penetration testing and reverse engineering in order to understand the perspective of cyber criminals and protect against them.

## BACHELOR OF DATA SCIENCE

Data Science covers data preparation, visualization, and analysis; everything you need to know in order to launch a career in the field. You'll learn to take a methodical, focused, and logical approach to data science problems, and the focus on practical problem-solving skills will have you ready for your future professional challenges, with confidence.

# CORE VALUES

IU is accredited and certified with a seal of approval from the German Accreditation Council. All IU study programs, materials, and services meet high internal and external quality standards, which are regularly reviewed and updated. We can also provide you with an official Europass Diploma Supplement once you graduate, to ensure that your degree is recognised anywhere in the EU.

# ADVANTAGES

1. Theoretical Foundation: We provide essential theoretical knowledge, paired with hands-on learning, to prepare you for your career.
2. Practice-Oriented Approach: We prioritize real-world applications to give you practical skills and experience.
3. Specialization Opportunities: Customize your studies with elective courses that align with your career goals for personalized growth.
